Just Say... Yes, Baby!

For all the would be moms out there – conception can be difficult when you're trying to squeeze in sex between work and laundry and you can't stop worrying about a million different things long enough to relax! It's a well known fact that stress affects not only fertility, but – how to put this – your personal level of comfort.

Unfortunately, many of the 'personal lubricants' on the market aren't exactly sperm friendly. If you're already battling a crowded schedule just to find time for a baby making session, you don't need any more hurdles in your way.

Good news – **Yes Baby Fertility Friendly Lubricant** is a 100% pure,

completely organic system that can help make things easier on both of you while maintaining a holistic approach to the entire process.

From handy ovulation sticks to clue you in on when to 'get frisky' to two different lubricants (one that's sperm friendly and another for a few days after your fertile period to adjust your 'down there' PH), **Yes Baby** lives up to its name.

Of course, you have to hold up your end of the bargain! Give yourself a stress free environment so you can enjoy what can definitely be a life changing moment in both of your lives. Call in sick to work, turn off the phones, put on the 'baby making music' and light a couple of candles. The best things always come when you aren't trying too hard, so relax and just let it happen.

Conception should be a special event. Say NO to stress and **Yes, Baby** – and let the good times roll!
